Mandatum Life SICAV-SIF - Slim Tail World Equity Fund - Share class B2 USD

ISIN code: LU1645487916

The fund is managed by Mandatum Life Fund Management S.A. which is part of the Mandatum Life Group.

Targets and investment policy

The Sub-Fund aims to achieve long-term capital growth by investing globally in listed equities and equity-related securities. The Sub-Fund seeks to achieve equity like returns with limited negative returns primarily through its active momentum based methodologies.

The proportion of equity-related securities in the Sub-Fund may vary between 0% and 125% of the net assets of the Sub-Fund. The Sub-Fund may enter into financial derivatives contracts for the purpose of hedging, efficient portfolio management and/or implementing its investment strategy. The Sub-Fund may invest in fixed-income and money market securities only for liquidity management.

Regardless of other investments, the Sub-Fund may invest in financial derivatives contracts (including, but not limited to, index futures) provided that the aggregated derivative position's net exposure to underlying assets does not exceed 125 % of the net assets of the Sub-Fund.

The benchmark index for the fund is STOXX Global Total Market USD (Net Return).

This share class does not distribute income; instead the return on investments is reinvested. However, distribution of the returns can be decided by the Board of Directors.

Investors can buy and sell shares of the fund on days which are banking days in both Luxembourg and Finland.

Recommendation: This fund may not be suitable for investors who intend to sell their fund shares within five years.

Base currency of the fund is USD.

Risk and reward profile

The fund's risk category describes the relationship between risk and reward and fluctuations in the fund share's performance. As the fund does not have sufficient performance history data, the fund's risk category has been calculated using the fund's investment-strategy-based simulation over the past five years. The fund's current risk category is 5.

The fund's risk category is based on a mathematical formula which does not take into account impairments, political risks or unpredictable fluctuations in interest rates or exchange rates. Even the lowest risk category (1) is not fully risk-free.

The risk-reward profile and risk category of the fund are subject to change over time. It is not possible to predict the risk and reward profile or future developments in the risk category based on the historical data of the fund's risk category.

Following risks should also be considered when investing in the fund, since they may not be fully included in the risk indicator:

- ◆ Counterparty risk: The fund's counterparties may fail to pay the proceeds on the sale of securities or fail to deliver purchased securities. The fund's OTC derivative counterparties may fail to meet their obligations during the life of OTC derivative contracts.
- ◆ Derivatives risk: Derivatives are used to increase, decrease or maintain the risk level of the fund. If the fund's derivatives strategy fails, the fund could suffer significant losses.
- ◆ Event risk: Unpredictable events such as sudden devaluations of foreign currencies or political events.
- ◆ Operational risk: Disruptions or delays in operational processes may affect the fund negatively.
